

Lucé

LED daylight
ceiling light D65

Stylish, precise daylight

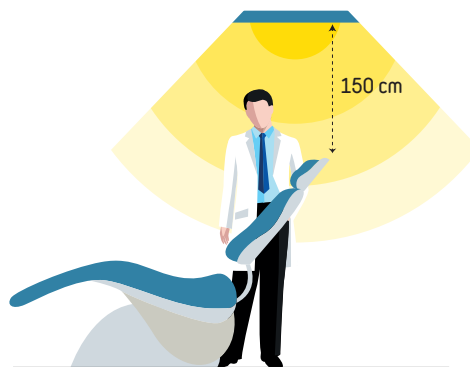

Lucé

Gamain has developed and designed the **Lucé LED ceiling light**.

Lucé gives you **true daylight**. You will feel the benefits whenever you switch it on. Even your most complex, meticulous work is illuminated. **Every nuance of colour and detail is revealed.**

Lucé reproduces the natural daylight, without shadow or dazzle, **for optimal visual comfort.**

Lucé has been developed by the Gamain Research and Development Centre.

At its development and manufacturing facilities in the heart of France's Loire Valley, Gamain produces professional lighting solutions that accurately mimic natural daylight.

This know-how stemming from Mr Gamain expertise in 1922 was passed down from one generation to the next.

Now part of the Médipréma group, Gamain has its own Research and Development centre bringing together **experts in the field of electronic, mechanical and optical design and implements a cutting-edge industrial manufacturing process.**

Gamain's expertise is recognised by professionals demanding the very highest standards, seeking to **protect their eyesight and benefit from flawless judgment of colours and surface conditions.**

Light sources (Direct/indirect lighting)	Colour temperatures	Colour Rendering Ra	Lighting at a distance of 150 cm from the work surface	Energy use in W	Power supply	Dimensions (L x W x H)	Weight	Colour
2 illuminants LED • D65 daylight LED • warm white LED Other configurations available: • 1 illuminant D65 LED alone • 4 illuminant LED: D65/warm white 2700°K/4000°K/5000°K	D65 LED: 6500°K Warm white LED: 2700°K Options: LED: 4000°K LED: 5000°K	96	1800 lux at 100% Variation of the luminous flow by remote control	223W	230V - 50Hz	121 x 47 x 8 cm (2 fastening points)	13kg	Silver gloss Red back-lit silhouette Other colours available as options

Precise daylight

Lucé reproduces daylight in accordance with **illuminant D65 criteria**, defined by international standard ISO 23603. **D65 certification** guarantees very high-quality, standardised working daylight.

Lighting to help you shine at work

Daylight is essential to a healthy physical and psychological balance. By reproducing natural daylight with the highest level of precision, the Lucé ceiling light :

- improves your concentration
- significantly reduces eye strain
- optimises well-being at work and helps boost your performance
- allows a perfect judgment of colours

The Lucé ceiling light guarantees LED daylight **without any peak in the light spectrum to harm your eyes**. The absence of this blue peak also **prevents accelerated polymerisation of materials**. You can thus express your professional expertise with confidence.

Remote control allows you to create optimal lighting conditions based on your specific requirements for each type of task (variation of light sources and light intensity).

Variations for every inspiration

The combination of technology and high-end materials enhances work spaces.

Lucé has a touch of bold design thanks to its back-lit silhouette, expressing the expertise of Gamain, **Made in the Loire Valley!**

The colours and silhouette of the ceiling light can be customised, giving you the freedom to reinvent your work space.

* the true daylight
