LED daylight  
ceiling light D65

Precise daylight

Light source	Colour temperature	Colour Rendering Ra	Lighting at a distance of 150 cm from the work surface	Energy use in W	Dimensions (L x W x H)	Weight	Colour
LEDs D65	6500°K	96	500 lux	45W	72 x 25 x 6 cm (2 fastening points)	4.5kg	Silver

Daylight is essential to a healthy physical and psychological balance. By reproducing natural daylight with the highest level of precision, the Plume ceiling light:

- improves your concentration
- significantly reduces eye strain
- optimizes well-being at work
- helps boost your performance

Plume reproduces daylight in accordance with illuminant D65 criteria, defined by international standard ISO 23603. D65 certification guarantees very high-quality standardised working daylight, without any blue peak in the light spectrum to harm your eyes.

With its touch of bold design and its silhouette expressing the expertise of Gamain, Made in Loire-Valley, the Plume ceiling light will blend harmoniously over your workspace.

Plume has been developed by the Gamain Research and Development Centre.

At its development and manufacturing facilities in the heart of France's Loire Valley, Gamain produces professional lighting solutions that accurately mimic natural daylight.

This know-how stemming from Mr Gamain expertise in 1922 was passed down from one generation to the next.

Now part of the Médipréma Group, Gamain has its own Research and Development centre bringing together experts in the field of electronic, mechanical and optical design and implements a cutting-edge industrial manufacturing process.

Gamain's expertise is recognized by professionals demanding the very highest standards, seeking to protect their eyesight and benefit from flawless judgment of colours and surface conditions.
